HOW TO RUN THE PROJECT

1. **Install Python (if not already installed)**

   - Download and install Python 3.8 or higher from https://www.python.org.

2. **Open Terminal / Command Prompt**

   - Navigate to your project folder using:

     ➔ cd path/to/Event Manager

3. **Install Required Libraries**

   - Run the following command to install Flask, Pillow, and qrcode:

     ➔ pip install Flask Pillow qrcode

4. **Ensure Fonts are Available**

   - Make sure the static/fonts/ folder contains .ttf font files (like DejaVuSans-Bold.ttf).

5. **Run the Flask Application**

   - Start the Flask app by running:

     ➔ python app.py

6. **Open the Web App in Browser**

   - After running, open your browser and go to:

     ➔ http://127.0.0.1:5000/

7. **Use the Application**

   - Click **Create Event** to input event details.

   - Posters are auto-generated.

   - Go to **Schedules** to view or modify the event schedule.

   - View past events under **History**.
